

Enhancing digital capabilities across the insurance lifecycle isn't as complex as it seems

Xenit and Alfresco have helped insurers of all sizes re-architect their organizations to be more agile and innovative and improve the entire insurance life-cycle — including underwriting, policy, billing, and claims.

DIGITAL CHALLENGES FOR INSURERS

WHAT WE OFFER

Large Archives and Fast Retrieval for Life, non-Life and Special Insurance

Alfred Archive is capable to ingest 50+ documents per seconds, adding meta-data in the process and controlling data quality. Alfred Archive offers a complete set of cloud, on premise and hybrid storage services for archiving, built upon Alfresco Digital Platform.

Integration and Accelerator with Third Party Applications

An archive repository is often a central component in an enterprise architecture and integrated with many business applications. Documents come from different sources and need to be made accessible for different applications both for the intranet and extranet.

Security and Compliance

Several companies may be well on the way to define how to handle GDPR compliance for structured data. But many companies still haven't come up with a good way to handle GDPR compliance for unstructured data like emails, documents, spreadsheet, listing.

CAPABILITIES

OBJECT STORAGE AND DRP	INTEGRATION	AGILE MIGRATION
Alfred Archive offers all tools and capabilities you need to migrate data with the solutions that are compatible with your IT environment.	Documents come from different sources and need to be made accessible. Our archive solution has been integrated with technologies from different vendors as well as legacy systems.	We provide solutions to import and export data from your current environment, such as Documentum or Mainframe to Alfresco.
✓ On Premise ✓ Hybrid ✓ Cloud Native	✓ GuideWire ✓ Alfred UX Products ✓ Google Drive ✓ SAP ✓ Salesforce ✓ Business Applications	✓ Metadata Enrichment ✓ High Volume Documents ✓ High Speed ✓ Traceability

BENEFITS FOR INSURERS

50% Reduction of Total Cost of Ownership

Shorter Turnaround Time

Security and Compliance

Long Term and Legal Archive

WHY WORK WITH ALFRESCO & XENIT

Application Processing

Shorten the time from application to quote by capturing the right information and delivering it, ready for underwriting to process, faster than ever before.

Underwriting

Improve underwriting excellence and efficiency with more straight-through processing and the ability to underwrite risk quickly, accurately & collaboratively.

Claims Processing

Bad claims experiences are a leading contributor to customer churn. Increase policy holder satisfaction — and loyalty — with faster, smoother claims resolution.

Customer Communications

Reduce the risks and costs associated with customer correspondence with a communications program that's efficient, compliant and auditable.

Expertise

Experience with the Insurance industries, building document models and supporting your processes.

Flexible Integration

With third party applications like Guidewire, So-Life, Salesforce.

Long Term Retention

Alfred Archive for scalable, long term retention.

Secure Sharing

Alfred Edge secured sharing with external parties.

"Xenit offers great functional and technical expertise. Service Operation and Service Transition are managed with the same commitment and quality."

Ethias has a true trusted partner to work on new challenges ahead."
